Research Forum - Monday, January 14, 12 to 1 pm

Targeting Cancer Stem Cells in the context of TGF-β signaling in Liver and GI cancers

The Research & Development team invites you to attend a lecture by Lopa Mishra, MD, Professor and Director at the Center for Translational Medicine and Department of Surgery at George Washington University.

Dr. Mishra’s research has led to more than 200 peer review articles in high impact journals such as Science, PNAS, Cell, Cancer Cell and Cell Systems, obtaining over 7000 citations. She is the recipient of numerous honors and awards including the American Gastroenterological Association Award for Top Women in Gastroenterology and the Fellow of the American Association for the Advancement of Science.

Dr. Mishra’s lecture will discuss complex TGF-β signaling that plays a dual role in cancer and how it can act as a tumor suppressor as well as a pro-metastatic factor. She will focus on the targeting of cancer stem cells in liver and gastrointestinal cancers in the context of TGF-β signaling.

**Date/Time:** Monday, January, 14, 12 to 1 pm

**Location:** Building 5E, Auditorium 5104 ABCD

**Presenter:** Lopa Mishra, MD

Lunch will be offered to the first 50 people at 11:45 am. Please come early to secure a seat.
